In an emergency, you can improve your chances of survival by quickly deciding which actions to take first. First, take personal protective action. Then, if it is safe to do so, warn others nearby. Next, and if safe to do so, warn and protect others in and around the building or space before calling 911 or emergency services as soon as you can. If others can help, delegate action to get aid faster. Always use your own judgment, since each situation requires a unique response.
